Appl. No. 09/880,388 Amdt. Dated January 5, 2005 Reply to Office Action of October 5, 2004

## Amendments to the Claims:

This listing will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

Claim 1 (Currently amended): A disposable diaper comprising:

- a liquid-pervious topsheet;
- a liquid-impervious backsheet;
- a liquid-absorbent core disposed between said liquid-pervious topsheet and said liquid-impervious backsheet;
  - a front waist region;
  - a rear waist region;
- a crotch region extending between said front waist region and said rear waist region in a longitudinal direction of the diaper;

wings formed on transversely opposite side portions of said rear waist region and extending outward in a circumferential direction intersecting said longitudinal direction, said wings having inner and outer exposed surfaces and circumferentially outer side edges and circumferentially inner side regions; and

Amdt, Dated January 5, 2005

Reply to Office Action of October 5, 2004

fastener sections formed on the inner exposed surface of said wings and extending outward in

said circumferential direction said fastener sections having inner surfaces and a strip of male

mechanical fasteners members formed on and extending from said inner surfaces,

said wings comprising a nonwoven fabric made of thermoplastic synthetic fibers,

a plurality of fine fusion spots being located on an exterior the inner exposed surface of the

wings, at which fine fusion spots said fibers are fused together, said plurality of fine fusion spots

being arranged so that there is a greater number of said fine fusion spots per unit area throughout

outer side regions of said wings that extend inward from inner transverse edges of the male

mechanical fastener strips over a transverse distance that is at least equal to widths of the male

mechanical fastener strips than in inner regions of said wings that extend inward from said outer side

regions.

Claim 2 (Previously presented): The diaper according to Claim 1, wherein said nonwoven fabric is

stiffer in circumferentially outer side regions of said wings than in circumferentially inner side

regions of said wings.

Claim 3 (Previously presented): The diaper according to Claim 1, wherein said male mechanical

fastener members are releasably engaged with said inward inner side surface regions of said wings.

Appl. No. 09/880,388 Amdt. Dated January 5, 2005 Reply to Office Action of October 5, 2004

Claim 4 (Currently amended): The diaper according to Claim 1, wherein said plurality of fine fusion spots comprise discrete spots that penetrate into the inner exposed surface of the wings.

Claim 5 (Previously presented): The diaper according to Claim 1, wherein the outer side regions of said wings extend inward from the male mechanical fastener strips over a transverse distance that is equal to widths of the male mechanical fastener strips.

Claim 6 (Previously presented): The diaper according to Claim 1, wherein the outer side regions of said wings extend inward from the male mechanical fastener strips over a transverse distance that is greater than widths of the male mechanical fastener strips.
